

JESÚS GERARDO TOLEDO RAMÍREZ

Full Stack Developer | React · Angular · Laravel · Node.js

Morelos, Mexico | jgerardo.toledor@gmail.com | +52 777 206 44 66 | linkedin.com/in/jesus-gerardo-toledo-ramirez | github.com/JGerardoToledoR

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building scalable web platforms using React, Angular, Laravel, and Node.js. Proven ability to deliver end-to-end solutions integrating REST APIs and cloud infrastructure (AWS S3). Passionate about clean code, agile practices, and building products that create real impact. Currently pursuing a B.S. in Software Engineering while applying skills in production environments.

WORK EXPERIENCE

Full Stack Developer · ITTEC

Jan 2026 – Present | Morelos, Mexico

- Designed and delivered a full-stack CRUD module using Angular + Laravel to manage internal product codes, reducing manual data entry time by an estimated 60% and eliminating spreadsheet dependency for the operations team (~5 direct users).
- Integrated AWS S3 cloud storage into the platform, enabling secure and scalable file management and replacing a local storage system prone to data loss.
- Maintained version control and collaborative workflows using Git/GitHub, enforcing branch strategy across the team.
- **Angular · Laravel · MySQL · AWS S3 · Git/GitHub · REST APIs** Tech stack:

Full Stack Developer Intern · ITTEC — Colegio ABC Educational Platform

Jan 2026 – Apr 2026 | Morelos, Mexico

- Collaborated on backend development for the Resource Center module, designing and maintaining normalized MySQL database tables that supported concurrent access by students and educators.
- Built responsive frontend views for the Resource Center using Angular and Bootstrap, improving content discoverability for platform users.
- Implemented AWS S3 integration for cloud-based file storage, enabling reliable upload and retrieval of educational materials across devices.
- **Angular · Laravel · MySQL · AWS S3 · Bootstrap · REST APIs** Tech stack:

PERSONAL PROJECTS

Smart Contract Developer & Tech Lead · EDUBLOCK — Decentralized Educational Platform

Oct 2025 – Nov 2025 | Personal Project

- Architected and developed smart contracts in Rust using the Soroban SDK on the Stellar blockchain, enabling on-chain issuance and tamper-proof verification of educational achievements.
- Designed decentralized logic to ensure full transparency, learner ownership of credentials, and equitable access — targeting underserved communities with no access to traditional certification systems.
- Led the project end-to-end: from system design and contract architecture to deployment and testing on the Stellar testnet.
- **Rust · Soroban (Stellar) · Blockchain · Decentralized Systems** Tech stack:

TECHNICAL SKILLS

Languages: JavaScript (ES6+) · TypeScript · Java · Rust · HTML5 · CSS3
Frontend: React · Angular · Bootstrap · Responsive Design · Component-Based Architecture
Backend: Node.js · Laravel (PHP) · Spring Boot · RESTful APIs · MVC Pattern
Databases: MySQL · MongoDB
Cloud & DevOps: AWS S3 · Git · GitHub · Version Control
Other: Flutter · Soroban (Stellar Blockchain)
Methodologies: Agile · Scrum · Clean Code

EDUCATION

B.S. in Software Engineering & Management · Universidad Tecnológica Emiliano Zapata
2024 – Present (In Progress) | Morelos, Mexico

Associate Degree — Software Development (TSU) · Universidad Tecnológica Emiliano Zapata
2022 – 2024 | Morelos, Mexico
